

# PULSE

Turn all your meters and pulse output into smart equipment.

Periodically report water, electricity and heat meter readings:

- index transmission,
- flow monitoring (min/max).

## MONITOR

Count the number of cycles of a piece of equipment and anticipate its maintenance.

## ALERT

AND/OR Trigger an alarm when:

- a fraud is detected,
- the flow rate exceeds a threshold (high/low),
- a leak is detected.

### Additional features:

- 2 configurable pulse inputs
- Fraud and leak detection
- Flow monitoring for a meter
- Data transmission modes: periodic and/or event-triggered
- Over 15 years of autonomy with standard configuration
- Autonomy optimization: data logging
- Local and remote product configuration

Monitoring energy consumption in a building (water, electricity, etc.).

Count the number of cycles of an equipment to anticipate its maintenance.
